I am a retired Louisiana educator. Currently every time teachers are afforded a raise of any amount, insurance premiums, without fail, will be raised at least an amount which matches the raise. Teachers who are retired do not get the raise. I am deeply concerned about a "for profit" entity purchasing BCBS because premiums now are incredibly high. I paid over \$13,000 (yes, 13k) in premiums last year. As a retiree, our options are limited.
