| Your Message | <p>As was a topic of interest on the Moon Griffon program today (Friday September 1) I am deeply concerned about the proposal to sell BCBS to a 'For Profit' company! I am a retired educator and BCBS is the supplemental insurance for most, if not all, state employees! You are retiring and once this sale should proceed without input from citizens of this state, once you are out of office you have essentially 'washed your hands' of any backlash that may occur from this 'rushed' sale which leaves the new commissioner with a problem on his hands and, even worse, problems on the hands on the thousands of state and other employees/employers! How you consider such a proposal or even proceed to finalize such a sale without consent from other officials as well as concerned citizens! I beseech you to reconsider and leave this matter to the new commissioner to investigate and make a decision once in office!</p> |
